

# SKF Universal CV Boots, Boot Clamps and Driveline Tools

The most complete repair solution for passenger cars and light commercial vehicles. Using the highest quality stretchy rubber compound, SKF universal boot kits are all you'll ever need!

## Universal Boots

**VKJP 01001: Universal cut-to-size boots for CV-Joint kits for passenger cars**

SKF VKJP 01001 is an universal cut-to-size boots for CV-Joint with outer diameter from 60 mm up to 120 mm.

**VKJP 01003: Universal cut-to-size boots for CV-Joint kits for Light Commercial Vehicles**

Universal cut-to-size boot for CV-joints with outer diameter from 75 mm up to 145 mm.

## Boot Clamps

**VKJML 01001**

VKJML 01001 is a set of 12 loose clamps contained into a plastic bag, suitable to tighten the small diameter of all specific rubber boot kits, Universal or Semi-universal boot kits, but not thermoplastic ones.

For a professional repair when tightening the clamps, it is recommended to use the SKF tool VKN 400. Incorrect tightening of the clamps can cause premature failure of the CV-Joint!

Clamp dimensions: Length: 250mm, Width: 5mm

Tightening tool: VKN 400

## VKJML 01002

VKJML 01002 is a set of 12 loose clamps contained into a plastic bag, suitable to tighten the large diameter of all specific rubber boot kits, Universal or Semi-universal boot kits, but not thermoplastic ones.

For a professional repair when tightening the clamps, it is recommended to use the SKF tool VKN 400. Incorrect tightening of the clamps can cause premature failure of the CV-Joint!

Clamp dimensions: Length: 760mm, Width: 5mm

Tightening tool: VKN 400

## VKJML 01003: Set of clamps for Thermoplastic boots

VKJML 01003 is a set containing six plastic bags of two clamps (for small and big diameter) suitable for Thermoplastic boots.

For a professional repair when tightening the clamps, it is recommended to use the SKF tool VKN 401. Incorrect tightening of the clamps can cause premature failure of the CV- Joint!

Clamp diameter:

- From 21 mm up to 45 mm
- From 64 mm up to 122 mm

Tightening tool: VKN 401

## Driveline Tools

### Clamp tools (VKN 400 and VKN 401)

- Specifically designed to tighten SKF Boots
  - VKN 400 for universal clamps
  - VKN 401 for ear clamps
- Accurate and even tightening ensures a reliable, long-term performance of the boot and consequently of the CV-joint.
- With the VKN 400, no need to use scissors/cutters to cut the universal clamps.

### Expander (VKN 402)

- Specifically designed for the reliable fitting of universal boots without the need to remove the CV-joint, saving time and reducing costs.
- A CE-marked pneumatic tool that can be used unplugged from the pneumatic air intake during the fitting.
- Safe and easy to use
- Lighter than competitor's tools
- No physical effort required to expand the boot
- Fits boots up to 115mm CV-joint external diameter
